SUMMARY

Frontend Developer with 1.3 years of hands-on experience delivering production-ready web interfaces using React.js, Redux Toolkit, Tailwind CSS, and Material-UI across corporate and product-based applications. Currently contributing to live client-facing platforms, building responsive, reusable component systems and integrating REST APIs with structured state management. Proven experience collaborating with backend teams, translating UI/UX designs into scalable code, and improving performance, accessibility, and cross-device compatibility. Strong focus on clean architecture, maintainable code, and shipping reliable frontend features in agile environments

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3

Frontend Frameworks: React.js, Redux Toolkit, React Router DOM

Styling: Tailwind CSS, Material-UI, Bootstrap

Tools: Git, GitHub, VS Code, Postman, Axios, MockAPI

Concepts: Responsive Design, REST API Integration, Agile Methodologies

PROFESSIONAL EXPERIENCE

Imexsun Pvt. Ltd.

OCT 2024 – Present

Front-End Developer

- Collaborated on the design and implementation of the company's main corporate website, improving UI responsiveness and accessibility across devices (desktop, tablet, mobile).
- Built and maintained frontend layouts using modern ReactJs, Material-UI, and Tailwind-CSS ensuring fast load times and cross-browser compatibility
- Developed dynamic components for core sections including About, Services, Contact, and Hire Developer, integrating with contact forms and UI elements
- Worked closely with backend/UX teams to translate UI/UX designs into polished code and enhance navigation, including sticky nav and interactive elements
- Ensured web content adhered to SEO and accessibility best practices, improving discoverability and user engagement
- Assisted in quality assurance testing and bug fixes before deployment to production, reducing post-launch issues by 30%

Front End Developer Intern

- Developed responsive and reusable UI components using React.js, Tailwind CSS, and Material-UI, following mobile-first and component-driven architecture principles
- Integrated frontend features with REST APIs using Axios, and validated API behavior using MockAPI during development and testing phases
- Collaborated closely with backend developers working on Node.js services to align API contracts and ensure smooth frontend-backend data exchange
- Structured scalable component hierarchies and maintained clean folder architecture to support future feature expansion
- Improved UI usability and cross-device compatibility through responsive layout techniques and systematic testing
- Participated in code reviews and iterative UI refinements to enhance performance and maintainability

KEY PROJECT

Web Express – Communication & Reporting Tool

Tech: React.js, Material-UI & Tailwind-CSS

Built responsive bulk messaging and reporting modules using React.js and Material-UI, with real-time validation integration.

Responsibilities:

- Developed frontend modules for bulk messaging and daily reporting using React.js and Material-UI
- Created reusable form components with real-time validation to improve user input accuracy
- Integrated frontend forms in collaboration with the Classmates
- Enhanced UI responsiveness and accessibility using Material-UI’s grid system across various devices
